Azure Storage Redundancy Options

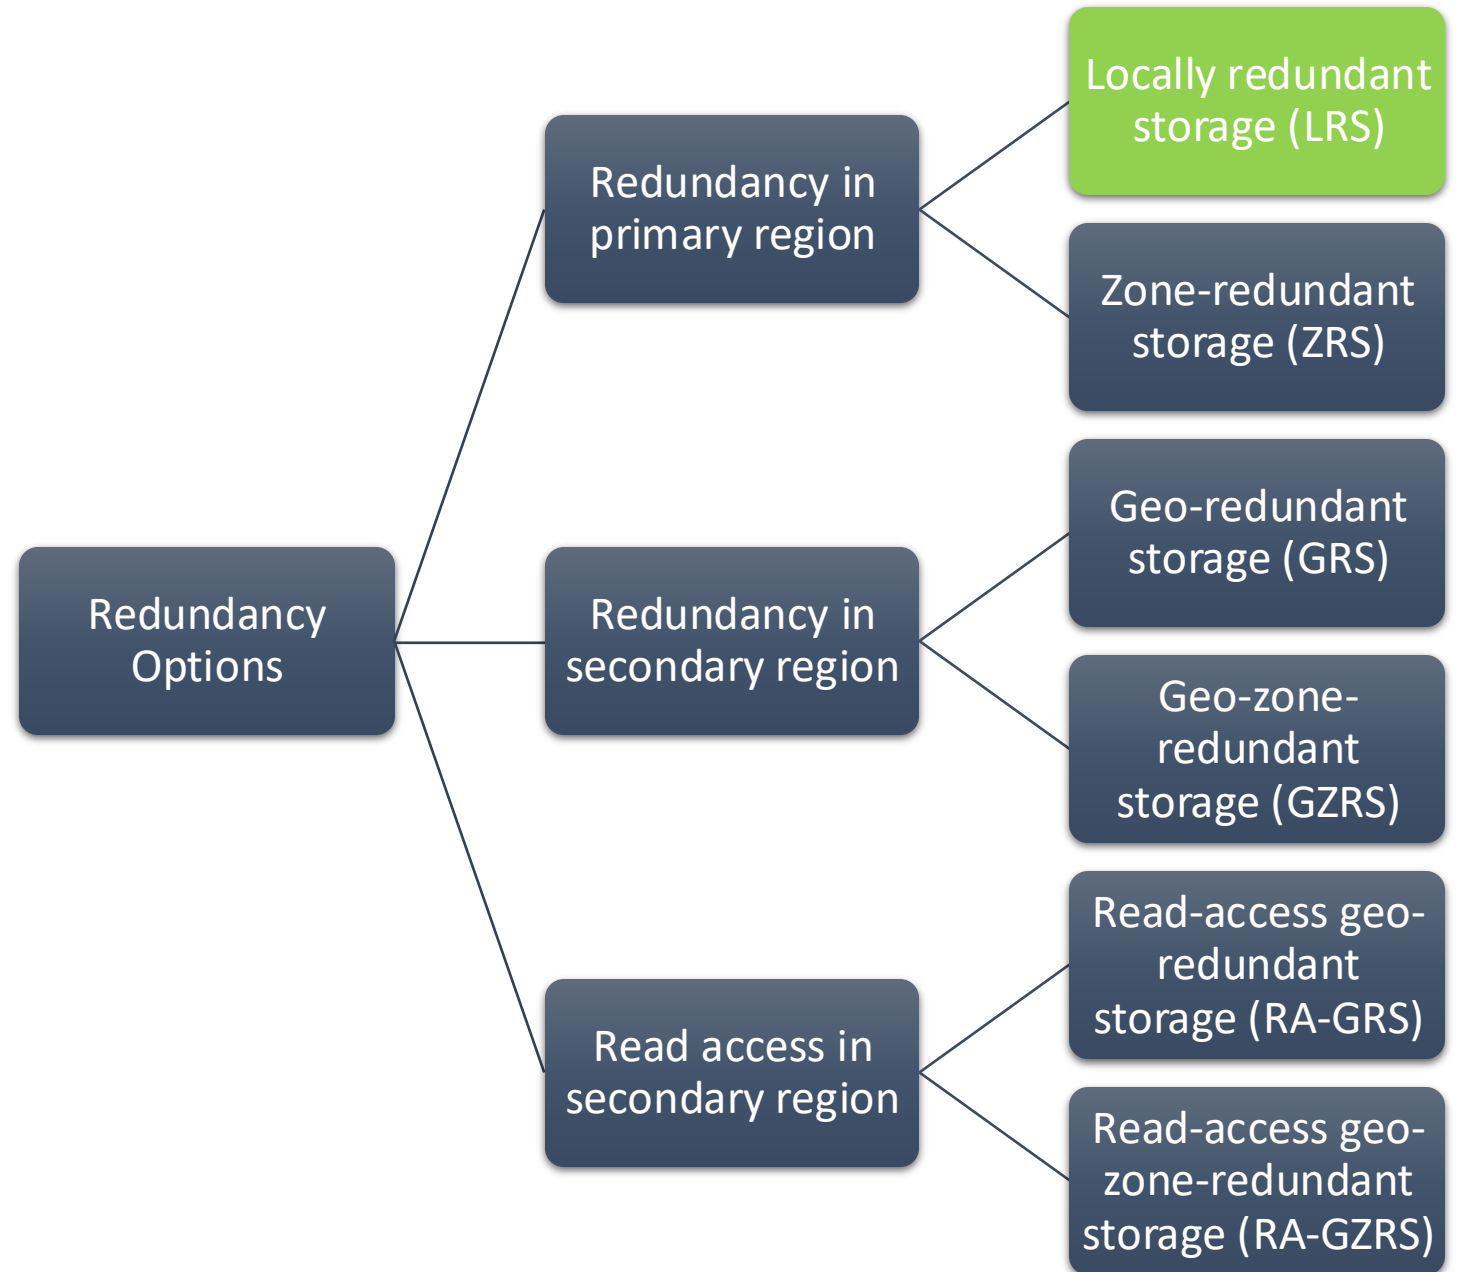

Praveenkumar Bouna, CodeWithPraveen.com

Redundancy Options

Redundancy Options

Locally redundant storage (LRS)

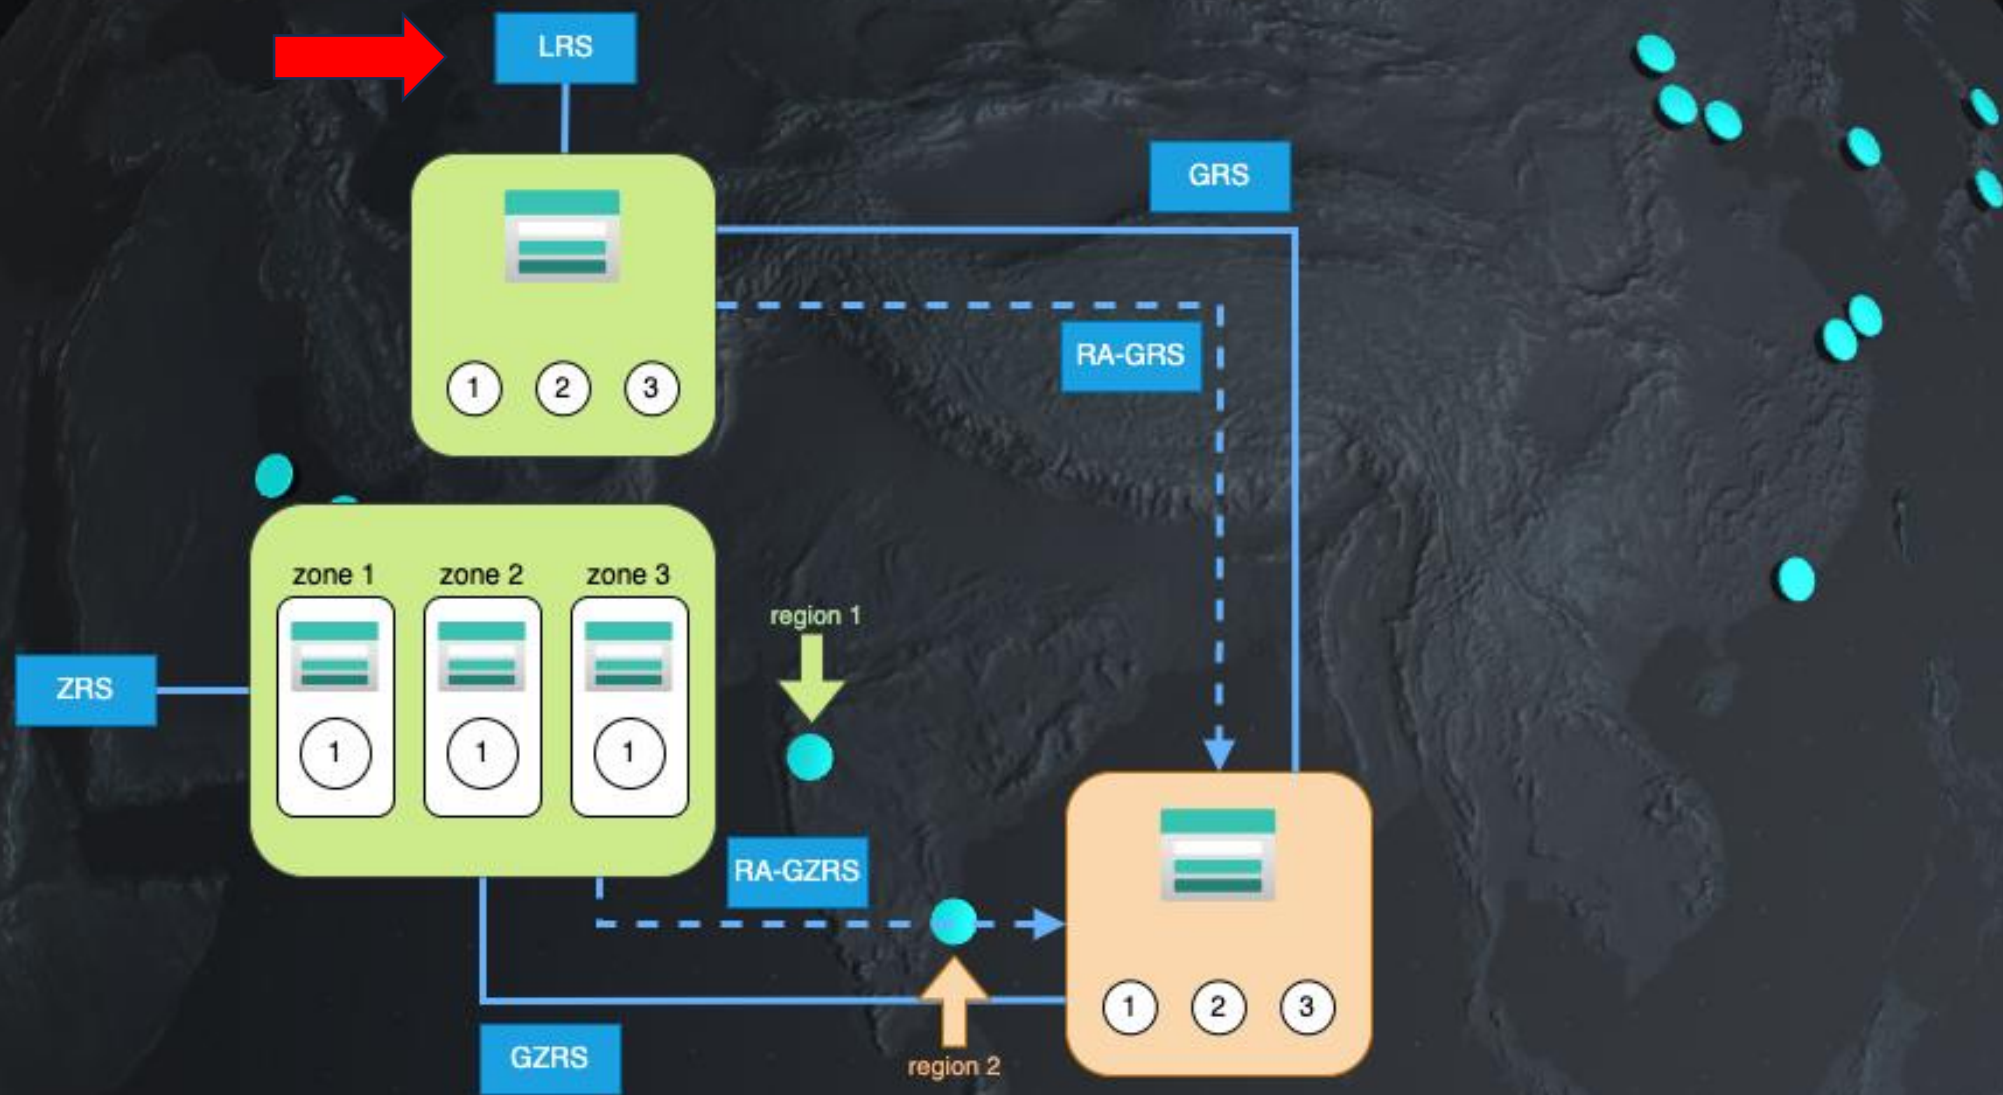

Data replicated 3 times
within the same data center

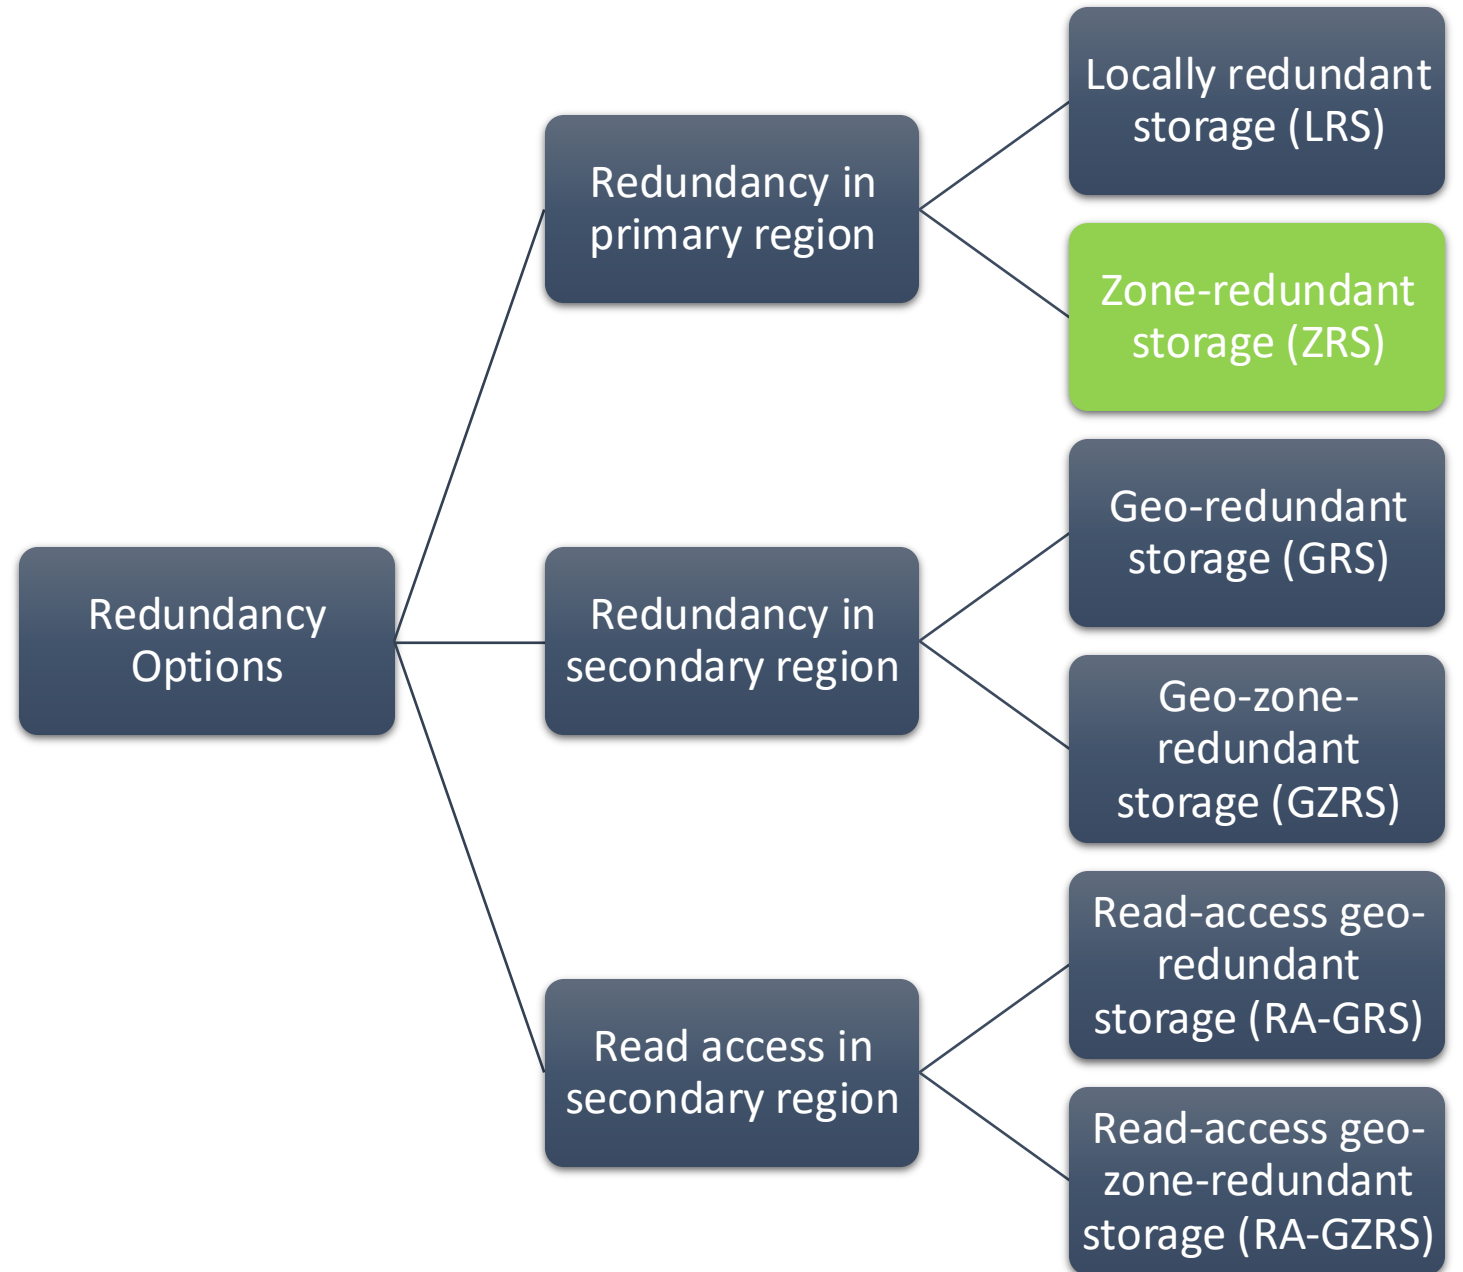

Cheapest option

Limitation: Data loss in case
of local disaster

Redundancy Options

Zone Redundant Storage (ZRS)

Data replicated
across 3 zones

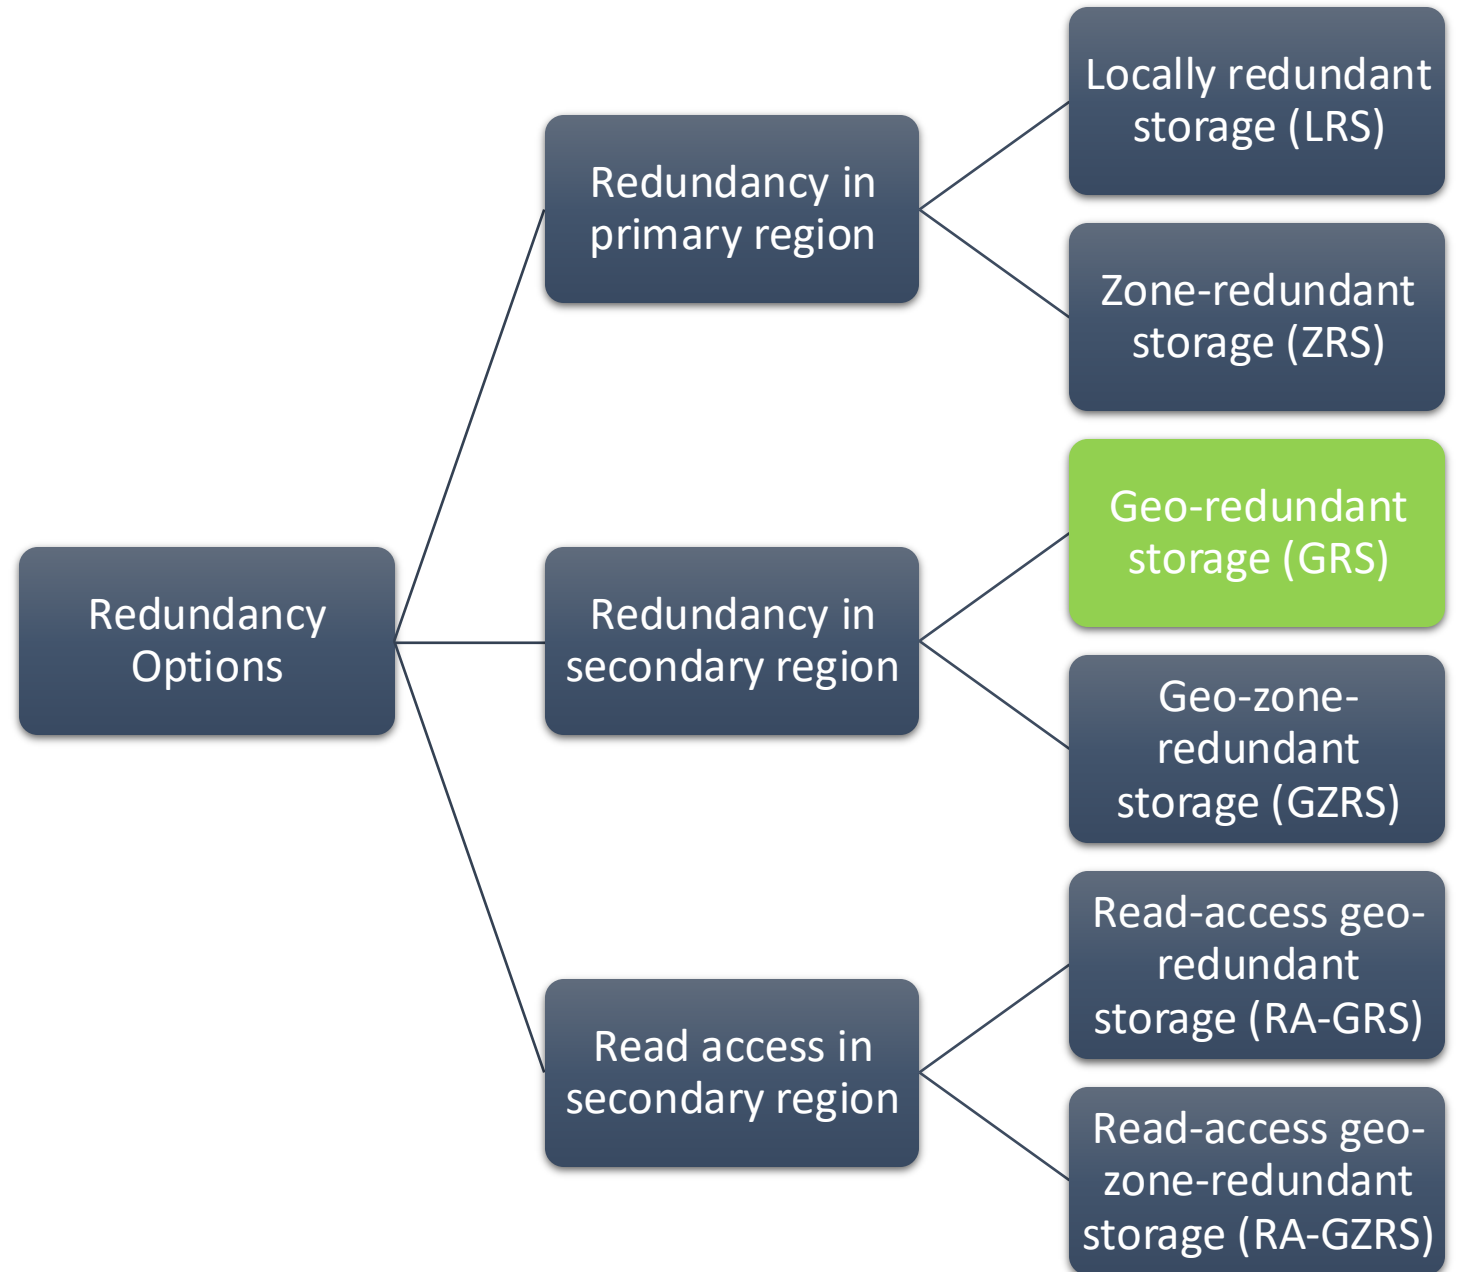

Data available even if
a zone is down

Use cases: High
availability

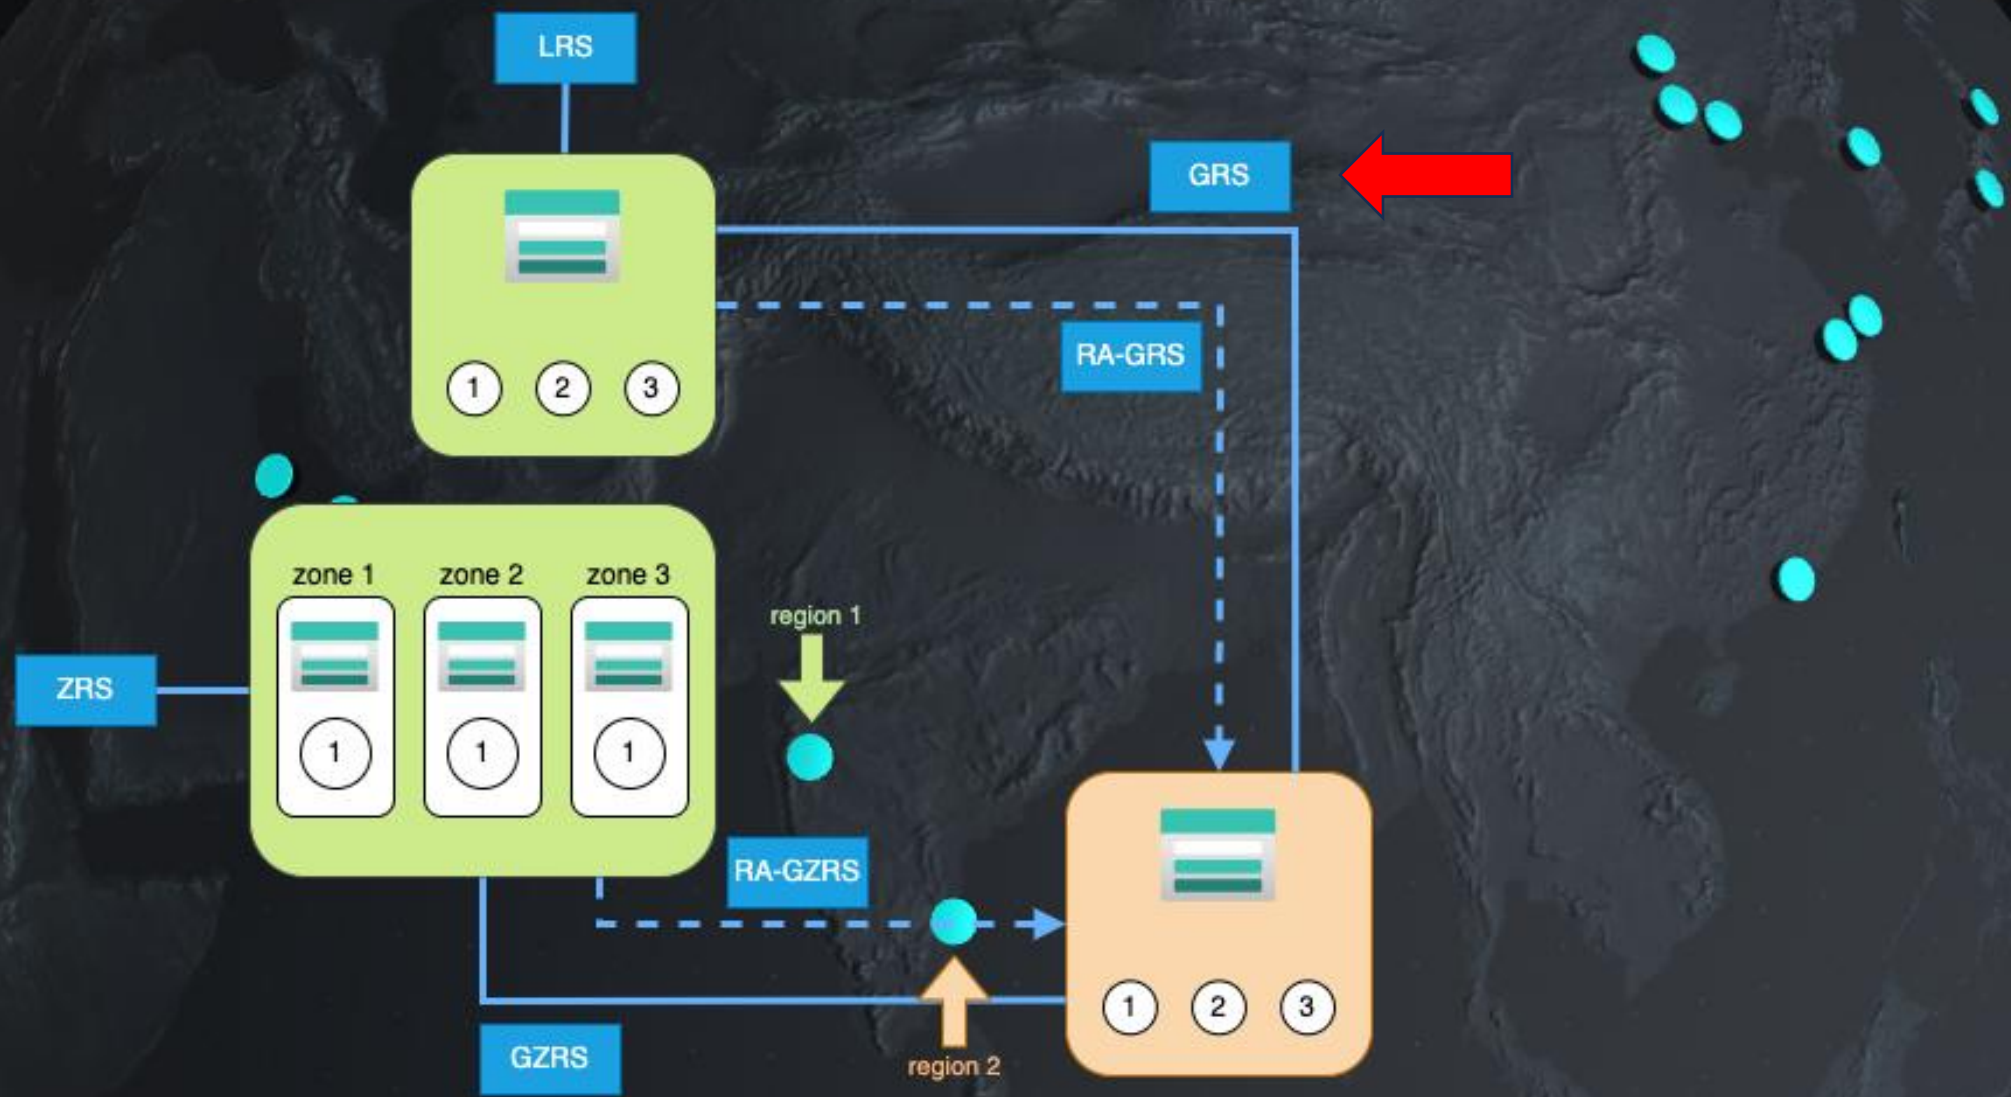

Redundancy Options

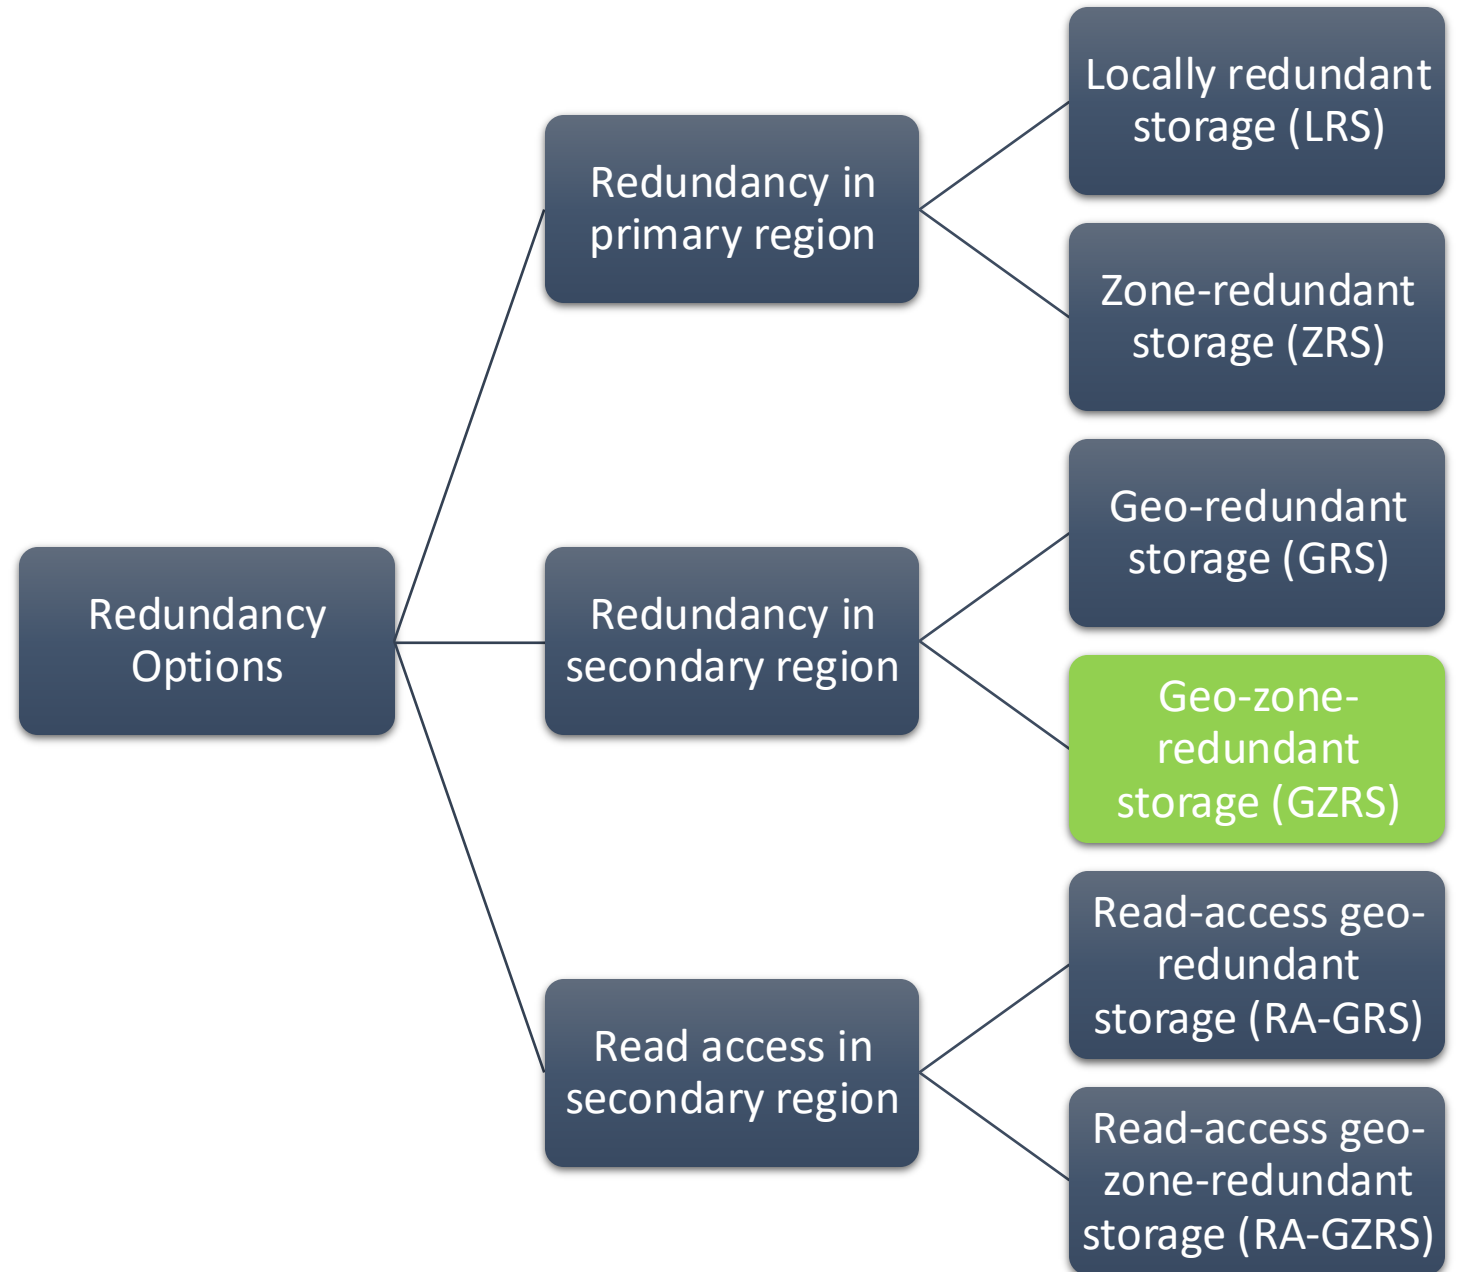

Geo-Redundant Storage (GRS)

Data replicated to a
secondary region

Both regions have 3 copies
each

Redundancy Options

Geo-Zone-Redundant Storage (GZRS)

Zone-redundancy in primary region

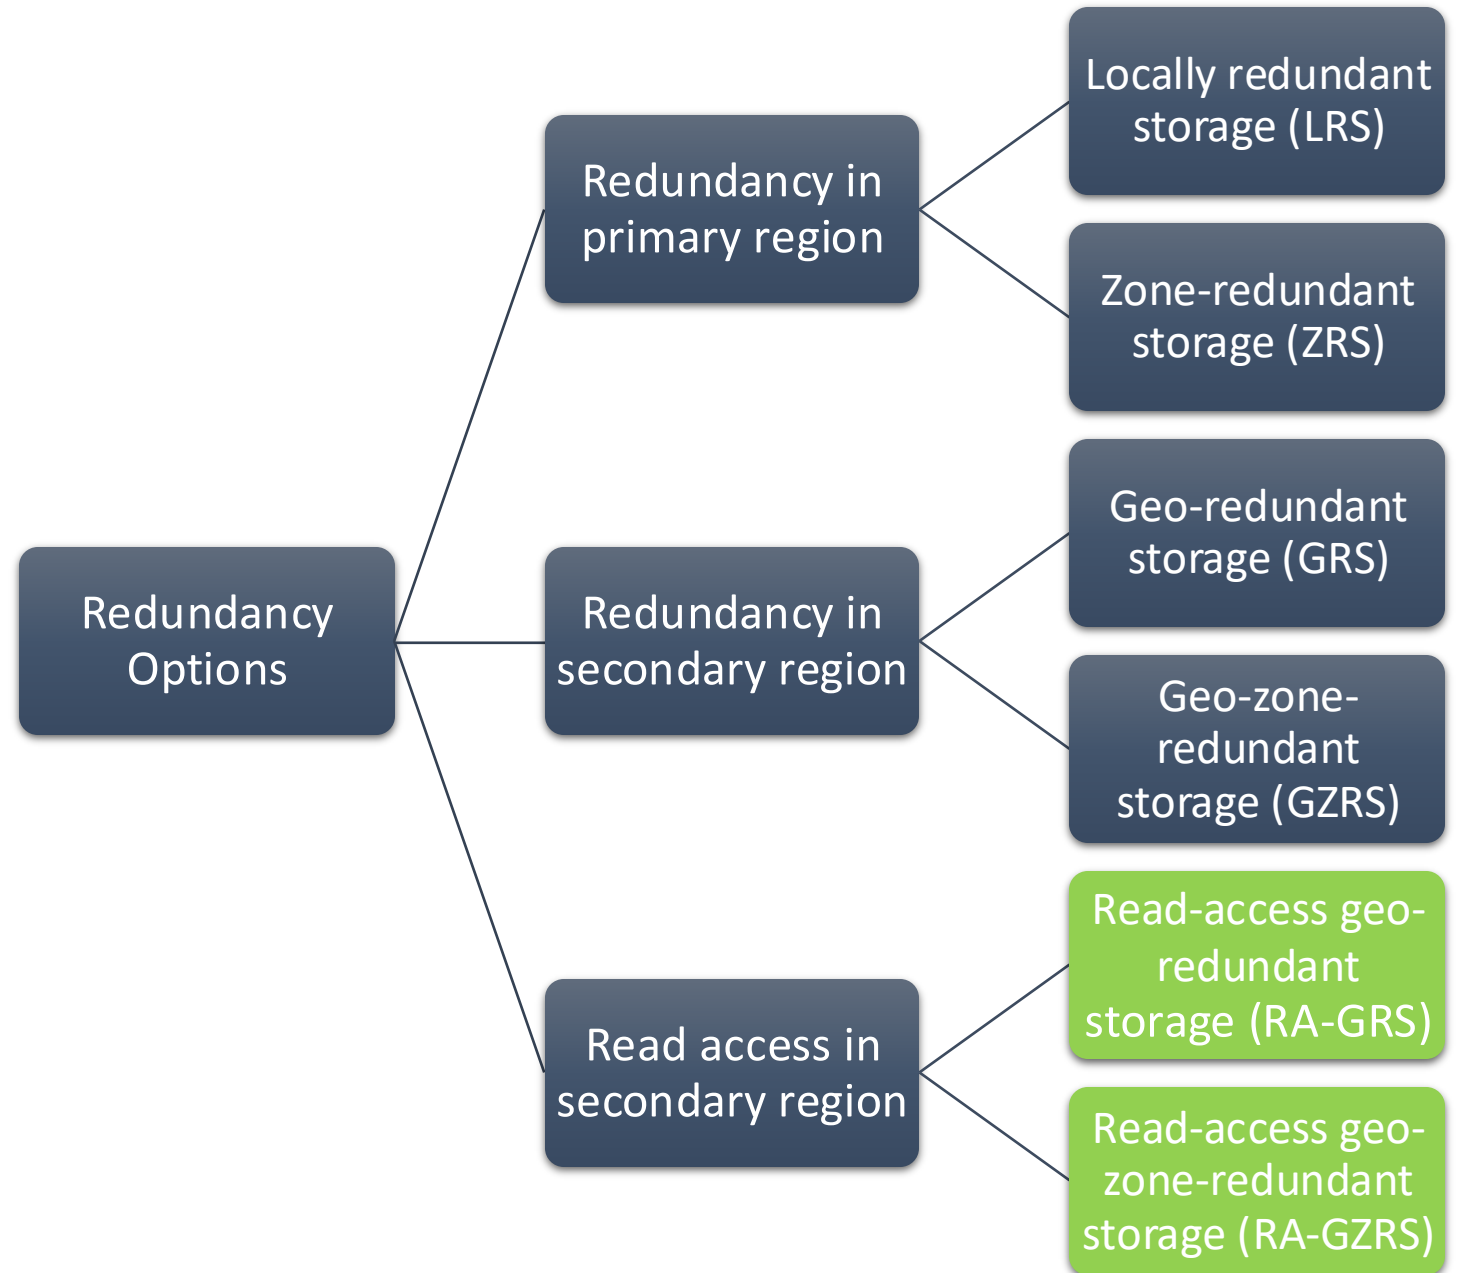

Data replicated to secondary region
with 3 copies

Read-Access in Secondary Region

Redundancy Options

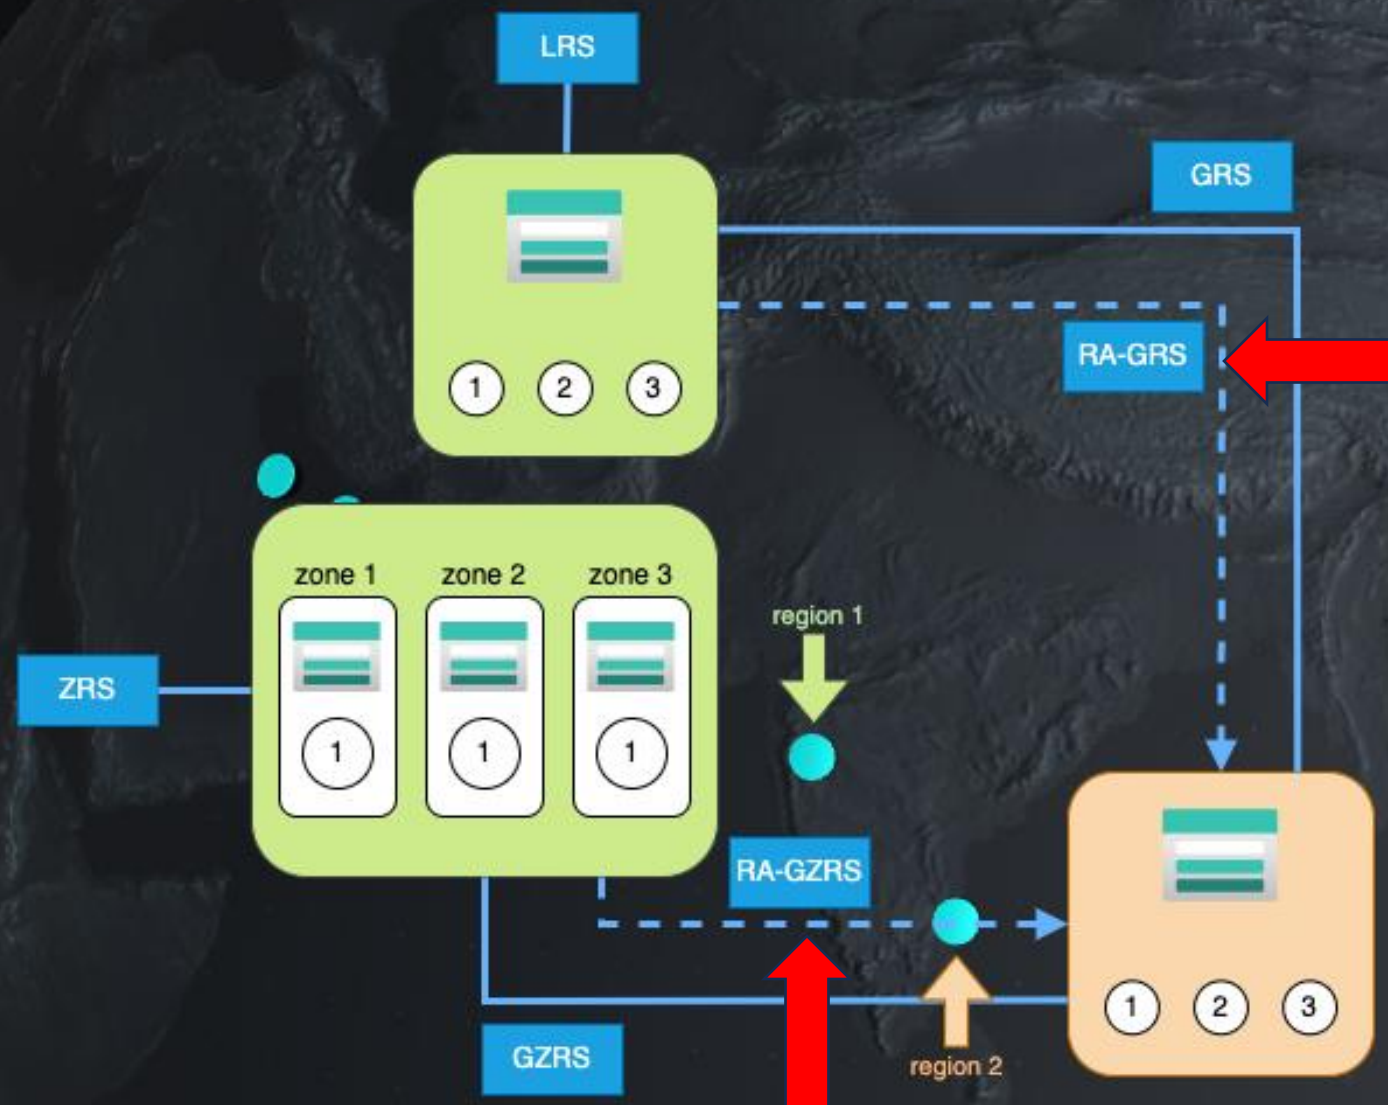

Read-Access in Secondary Region

Read access to data in the
secondary region

Redundancy in primary
region

Azure Storage Services

Types of Azure Storage Services

Azure Blobs

Azure Files

Azure Queues

Azure Disks

Benefits of Azure Storage

- Highly available
- Secure
- Scalable
- Managed

Azure Blobs

- Object storage solution – image, video, files, etc
- Store image, video, audio, files, etc.
- Accessible via URLs, API, CLI, SDKs.

Azure Files

- Fully managed file shares
- Accessible via SMB or NFS protocols
- Similar to network share

Azure Queues

- Store large number of messages
- Accessible via HTTP/HTTPS

Azure Disks

- Azure Managed Disks
- Block-level storage volume

Azure Blob Storage Tiers

Praveenkumar Bouna, CodeWithPraveen.com

Blob Storage Tiers

Access Tier	Online/Offline	Minimum Storage days	Access Cost	Storage Cost	Use as Default Tier	Ideal Use Case
Hot	Online	NA	Low	High	Yes	Accessed frequently
Cool	Online	30	High	Low	Yes	Accessed infrequently
Cold	Online	90	High	Low	No	Accessed infrequently
Archive	Offline	180	High	Low	No	Rarely used

Azure Migration

Praveenkumar Bouna, CodeWithPraveen.com

Azure Migrate

- Unified migration platform
- Extensive toolset:
 - Azure Migrate: Discovery and assessment
 - Migration and modernization
 - Data Migration Assistant
 - Azure Database Migration Service
 - Web app migration assistant
 - Azure Data Box

Azure Data Box

- Physical migration service
- Reliable and inexpensive data transfer
- Ideal use cases:
 - One-time migration
 - Moving extensive library
 - Bulk transfers
 - Periodic uploads

Azure File Movement Options

- AzCopy
- Azure Storage Explorer
- Azure File Sync

Azure File Movement: AzCopy

Upload &
download files

Copy files between
storage accounts

Synchronize files

Works with other
cloud providers

One-direction
synchronization

Azure File Movement: Azure Storage Explorer

Standalone app

Graphical interface

Manage files &
blobs

Upload to &
download from
Azure

Move between
storage accounts

Backend: AzCopy

Azure File Movement: Azure File Sync

Centralize file shares
in Azure Files

Windows file server
as a CDN

Bi-directional
synchronization

Access data locally
